## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 112***

Claim 11 recites the limitation "the standing figure" in line 1. There is insufficient antecedent basis for this limitation in the claim.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 4, 6, 7, 10, 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Peck U.S. Patent 1,205,779.

Peck disclosed a kit for coloring comprising a corrugated coloring structure (13); a coloring instrument (14) for coloring; a shipping box (10) for enclosing the corrugated structure and the coloring instrument as shown in Fig. 1 (claim 1). The coloring instruments are paint (14) and brush (16) (claims 3, 4, 13). The coloring structure includes a pre-printed outline and a figure (Fig. 1) (claims 6 and 7). The shipping container comprises a first and second planar structure (10, 11), each of the planar structure is capable being positioned beneath the coloring structure and sized and dimensioned to extend to a perimeter extending the structure (claim 10).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3714

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Peck in view of Cohen U.S. Patent 6,022,219.

It is noted that Peck failed to teach the use of a drop cloth as set forth therein. However, such drop cloth is very well known in the art as evidenced by drop cloth (31) made from a sheet material (col. 2, line 62). Therefore, it would have been obvious to one of ordinary skill in the art to modify the kit of Peck with the drop cloth as taught by Cohen for the purpose of providing a clean working environment for the user.

Claims 5, 8-12, 14-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Peck in view of Walker U.S. Patent 4,212,130.

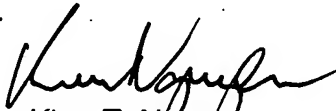

It is noted that Peck failed to teach the coloring structure as being the elements as set forth in these claims. However, such playhouse or similar three-dimensional structure is known in the art as evidenced by playhouse made of a plurality of folded corrugated structures (1-5), the structures also having at least one slot (44) and at least one tab (50), the tab being insertable in the slot to assemble the structure. Therefore, it would have been obvious to one of ordinary skill in the art to modify the structures of Peck with the plurality of folded corrugated structures as taught by Walker for the advantage of expanding the painting skill of the user.
